SURGITECH
medasia
medical products corporation
Quality healthcare for every Filipino

THE MEDASIA STORY

In 2007 we launched Medasia with a single product—Surgitech surgical staplers—that quickly earned the trust of surgeons at UST Hospital. Encouraged by that success, we expanded into essential medical consumables and secured our first long-term hospital contract. Over the next decade, fresh capital fueled our expansion into hemodialysis consumables and core laboratory equipment

The healthcare landscape evolved, and so did we. By 2018 we were introducing niche technologies to the Philippines—from far-infrared therapy to point-of-care wireless ultrasound and portable ventilators. In 2022 Medasia leapt decisively into the operating room and ICU, launching advanced vessel sealers, electrosurgical platforms, and critical-care monitors. Last year our footprint grew again—this time into endoscopy, urology, medical robotics, and next-generation wound-care solutions—ensuring clinicians can rely on one partner from triage to rehabilitation.

Today a 120-strong team supports more than 500 SKUs nationwide through 40 sales professionals, 280 dealer partners, and a robust, SAP-driven supply chain. Every day we help millions of Filipinos access reliable, affordable care—because we believe world-class health care should never be out of reach.

AT A GLANCE

- 8 Business Units
- 8,000 sqm warehousing
- 6 biomedical engineers on call 280 active dealers nationwide
- Platinum-Tier government supplier
- ISO certification in progress
- Powered end to end by SAP

Mission

To make quality healthcare more affordable and accessible by delivering innovative, reliable medical products and exceptional service to hospitals, clinics, and patients throughout the Philippines.

Vision

To be the Philippines' most trusted and forward-thinking catalyst for medical innovation—continually scouting and introducing breakthrough solutions not yet available locally, and setting the national benchmark for quality, affordability, and service excellence.

Sterile Hypodermic Needles

Single use

Surgitech Hypodermic Disposable Needles are meticulously crafted with precision-ground tips and beveled edges, designed to ensure smooth penetration and minimize discomfort for patients.

Features & Benefits

- Packaged individually in a peel-pouch for secure storage and easy transport
- Features a transparent luer-lock hub made from polypropylene material
- Ultra-sharp, thin-walled design for improved precision
- Double bevel tip for smoother and easier insertion

GENERAL NURSING

Disposable Syringes

Surgitech's single-use, sterile syringes are engineered for precise and safe medication delivery and fluid aspiration. Each unit consists of a transparent barrel with clear graduation markings, a smooth-gliding plunger, and a secure Luer lock tip to ensure a leak-proof connection.

Features & Benefits

- With strong scale indications to ensure dose management and precision.
- Luer-lock syringe tip for combination units
- Ultra clear polypropylene barrel syringe with needle contains an ultra sharp needle, finely honed and beveled for ease of penetration.

FUJIKAWA

Disposable Syringes with Needle

Fujikawa Disposable Syringe with Needle is a sterile, single-use medical device designed for the precise and hygienic administration of fluids and medications. It consists of a graduated barrel, a plunger with a tight-fitting gasket, and an attached hypodermic needle for efficient injection or aspiration.

Features & Benefits

- Non-toxic and non-pyrogenic, ensuring patient safety.
- Precision-molded barrel with clear graduations for accurate dosage.
- Medical-grade stainless steel needle with a sharp, beveled tip for smooth penetration.

SURGITECH

Auto-Disable Syringe

Syringe reuse is prevented by automatically deactivating the plunger once the medication has been thoroughly injected into the patient.

Features & Benefits

- Designed with a secure plunger lock that permanently deactivates after a single use.
- Constructed from medical-grade, non-toxic polypropylene for reliable performance.
- The clear barrel with bold graduation markings allows for precise dosage measurement.

DESCRIPTION/SIZE	UOM	QTY/PACK

SURGITECH

Safety Blood Collection Set

Features & Benefits

- Push Button for retracting needle offers a simple effective way to collect blood while reducing the possibility of needlestick injuries.
- Flashback window assists the user to recognize successful vein penetration.
- With pre-attached needle holder is available.

DESCRIPTION/SIZE
Size: 22G

SURGITECH

Safety Arterial Blood Collection Syringe

Features & Benefits

- Pre-heparinized with a balanced lithium heparin formulation to prevent coagulation.
- The syringe is equipped with a luer-lock tip for secure needle attachment.
- A protective cap is included to seal the sample for safe handling and transport.

CODE	DESCRIPTION/SIZE	
MED-0641	1ml / 22G x 1 - Safety type	MDR-10481
MED-0642	3ml / 22G x 1 - Safety type	MDR-10481

SURGITECH

Tuberculin Syringe with Needle

Features & Benefits

- The syringe has a low-dead-space design, ensuring minimal medication waste.
- The integrated safety shield on the needle protects healthcare workers from accidental needlestick injuries.
- The clear barrel features easy-to-read, bold graduations for accurate dosage measurements.
- The fixed needle is ultra-fine and has a short bevel, designed to reduce patient discomfort during injection.

CODE	DESCRIPTION/SIZE	
MED-0373	Tuberculin Syringe w/Needle, 1ml/cc (25G x 5/8)	CMDR-2022-00489
MED-0374	Tuberculin Syringe w/Needle, 1ml/cc (26G x 1/2)	CMDR-2022-00489

SURGITECH

Insulin Syringe

Features & Benefits

- The syringe has a low-dead-space design, ensuring minimal medication waste.
- The integrated safety shield on the needle protects healthcare workers from accidental needlestick injuries.
- The clear barrel features easy-to-read, bold graduations for accurate dosage measurements.
- The fixed needle is ultra-fine and has a short bevel, designed to reduce patient discomfort during injection.

Blood Collection Tubes

Blood collection tubes are essential for safely collecting, storing, and transporting blood samples for medical tests and laboratory analysis.

Features & Benefits

- Durable, sterile design ensures contamination-free sample collection and storage.
- Clearly labeled tubes with volume markers for accurate blood sample measurement.
- Compatible with standard phlebotomy equipment for seamless usage in medical settings.
- Leak-proof cap prevents spillage and maintains sample integrity during transport.

Blood Collection Tube

Cell-Free DNA

A specialized blood collection tube designed for the stabilization and preservation of cell-free DNA, ensuring accurate analysis in clinical and research applications. It supports reliable sample integrity from collection to processing.

Features & Benefits

- Maintains cell-free DNA stability for extended periods
- Minimizes contamination and degradation during transport and storage

DESCRIPTION/SIZE	UOM	
DNA101938G	Tray	IVDR-00903

Micro Blood Collection Tube

Capillary, Gel & Clot Activator

Used to obtain a serum sample, in which the sprayed process has been inhibited. Single use, Vacuumed, sterile blood collection tubes containing gel and clot activator.

Features & Benefits

- Contains clot activator and separation gel for rapid and clean serum preparation
- Manufactured with high-quality materials to maintain sample integrity

DESCRIPTION/SIZE	UOM	
NP050245-0.5ml	Tray	IVDR-00936

ADVAN**Pregnancy Test Kit**

The HCG Pregnancy Test Kit is designed to provide a quick, accurate, and easy-to-use method for detecting pregnancy by identifying the presence of the HCG hormone in urine.

Features & Benefits

- Simple to use with clear instructions, ensuring accurate results at home.
- High sensitivity for detecting early pregnancy.
- Fast results within minutes for convenience and peace of mind.

**SURGITECH****Disposable SP02 Sensor**

Disposable SpO2 sensors are indicated for continuous noninvasive arterial oxygen saturation (SpO2) and pulse rate monitoring.

Features & Benefits

- Single-use design ensures patient safety and prevents cross-contamination
- Soft, biocompatible adhesive material provides secure yet comfortable placement
- Compatible with standard pulse oximeters and extension cables

CODE	DESCRIPTION/SIZE	
MED-0283	Disposable Soft Tip SP02 Sensor - Adult	-

Stoma Care Products

Stoma care products are designed to help individuals manage their stomas comfortably and hygienically. These products provide security, convenience, and peace of mind for those living with a colostomy, ileostomy, or urostomy.

Features & Benefits

- STOMA POWDER is designed to absorb moisture from raw or broken skin surrounding a stoma.
- STOMA ADHESIVE PASTE is a protective skin barrier and filler to help increase ostomy wear time while protecting the skin. Stomahesive Paste helps prevent leakage around the stoma by filling in the gaps and minimizing skin irritation.
- PROTECTIVE RING is designed to improve the fit of an ostomy bag system. Made with hydrocolloid skin adhesive.
- SKIN BARRIER adheres to your peristomal (around the stoma) skin, helping protect your skin from stoma output, and attaching the pouch to your body.
- STOMA BELT protects your urostomy or colostomy bag or appliance by securely holding it up against your body.
- SKIN PROTECTIVE FILM Use Skin Protective Film Swab to protect the skin around your stoma.

Safety I.V. Catheter

With Injection Port & Wings

Surgitech Safety I.V. Catheter is used to provide access to the peripheral system for the delivery of IV fluid and medication. It has integrated safety feature, covering the needle after use to prevent accidental needlestick injury.

Features & Benefits

- Tapered and siliconized which offers high resistance to kinking
- Minimum resistance during insertion, less traumatic to the patient
- With radiopaque line for placement confirmation during X-ray
- Color-coded
- Latex-free, DEHP-free and PVC-free

DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN	
With Wing & Port: 14, 16, 17, 20, 22, 24	Box	100	10	CMDR-2023-01682

Ann Safety IV Cannula

Wings and Injection Port

Provides secure venous access for fluid administration and medication delivery while reducing the risk of needlestick injuries. Designed for safe, sterile, and efficient use in hospital and clinical settings.

Features & Benefits

- Sterile, medical-grade construction for safe and hygienic use
- Integrated injection port allows convenient medication administration without repeated venipuncture
- Winged design ensures secure fixation and reduced patient discomfort
- Smooth flow channel supports consistent infusion and minimizes the risk of complications

DESCRIPTION/SIZE	UOM	
Size: 14G, 16G, 17G, 18G, 20G, 22G, 24G, 26G	Box	CMDR-2025-040888

Safety IV Cannula

Wings and Injection Port

Features & Benefits

- Sterile, single-use device with safety mechanism to minimize accidental exposure.
- Flexible wings provide stability and secure placement during insertion.
- Injection port allows for convenient administration of additional medications.

DESCRIPTION/SIZE	UOM	
Sizes: 14G, 16G, 17G, 18G, 20G, 22G, 24G, 26G	Box	CMDR-2025-04088A

Heparin Cap

Features & Benefits

- Sterile and single-use to ensure patient safety
- Provides a secure closure for IV lines and catheters
- Helps minimize the risk of infection and contamination
- Designed for compatibility with standard IV access systems

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN	
MED-0184	Transparent Heparin Cap	Pc	100	50	CMDN-2023-00710

Extension Tubing

Luer Lock

Features & Benefits

- Provides extended reach for IV lines, improving patient mobility and comfort.
- Features a secure luer lock connection to prevent accidental disconnection.
- Made from kink-resistant tubing to ensure consistent fluid flow.
- Latex-free and compatible with a wide range of medical device.

DESCRIPTION/SIZE	UOM	QTY/BOX	
Size: 100cm, 140cm	Pc	1	CMDR-2024-03212

Extension Tubing Adapter

Features & Benefits

- The adapter provides a secure, leak-proof connection for extending fluid lines.
- The sterile, non-pyrogenic design ensures patient safety and prevents contamination.
- Its transparent body allows for visual confirmation of fluid flow and air bubbles.
- Compatible with a wide range of standard luer lock syringes and IV tubing.

CODE	DESCRIPTION/SIZE	UOM	
MED-0410	Extension Tubing Adapters: Two-Way	Pc	-
MED-0411	Extension Tubing Adapters: Three-Way	Pc	-

Multi-Lumen NF Extension Tube

Features & Benefits

- The multi-lumen design allows for the simultaneous delivery of multiple medications or fluids.
- Non-fenestrated tubing ensures direct flow without side ports, reducing complexity.
- It is latex-free, making it safe for patients with latex allergies.
- The flexible, kink-resistant tubing ensures reliable and consistent flow.
- Easy to connect with various medical devices, offering convenience in complex medical settings

DESCRIPTION/SIZE	UOM	QTY/BOX

Scalp Vein Set

A sterile, single-use device designed for venous access with precision and safety. It allows reliable administration of fluids and medications, supported by flexible tubing and secure winged needles for ease of handling.

Features & Benefits

- Sterile, disposable design ensures safety and infection control
- Flexible wings allow secure fixation and comfortable handling
- Ultra-sharp needle minimizes patient discomfort during insertion
- Transparent tubing enables clear visualization of blood flow

Infusion Set

Micro & Macro Drip

Provides controlled administration of fluids and medications, with options for micro or macro drip rates to ensure precise delivery. Designed with high-quality components to support safe and consistent infusion.

Features & Benefits

- Offers both micro and macro drip options for precise or rapid fluid delivery.
- Equipped with a clear drip chamber for easy monitoring of fluid flow.
- Made with sterile, medical-grade materials to ensure patient safety.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN

MED-0214	Surgitech IV Micro Set - Adult	Pc	25	16	MDR-08422

Infusion Set

with Burette

Designed to deliver precise volumes of fluid and medication, this device incorporates a calibrated burette chamber that allows accurate measurement and controlled infusion. It ensures reliable flow regulation and is suitable for use in standardized hospital settings.

Features & Benefits

- The burette allows precise measurement and controlled administration of small fluid volumes.
- Equipped with a clear, graduated chamber for accurate dosing and easy monitoring.
- The latex-free components ensure safe use for patients with allergies.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN

I.V. Dressing

Transparent & Waterproof Film Dressing

Provides a sterile barrier to protect IV sites while allowing continuous visualization of the insertion area. Its transparent, waterproof material ensures secure fixation and minimizes the risk of external contamination during clinical use.

Features & Benefits

- ransparent film enables clear monitoring of the catheter site.
- Waterproof and breathable material maintains skin integrity.
- Hypoallergenic adhesive ensures reliable fixation with minimal skin irritation.
- Sterile, single-use packaging supports infection control standards.

Torniquet

Latex Free

A high-quality, latex-free tourniquet designed to provide reliable venous constriction during blood collection and medical procedures. It ensures patient safety by eliminating latex-related risks while maintaining consistent elasticity and durability for repeated use.

Features & Benefits

- Tear and slip resistant that ensures safe and effective constriction of vein and artery
- Soft and Hypoallergenic
- Retractable and Flat tourniquet type.
- Both tourniquets are safe for patients with latex sensitivities.
- The flat tourniquet is simple to apply while the retractable version offers fast, automatic retraction.

Infusion Access Adapter

Features & Benefits

- Ensures a tight, leak-proof connection for accurate fluid transfer
- Compatible with a wide range of infusion systems and access devices
- Manufactured from high-quality, medical-grade materials for safety and durability
- Compact and lightweight design allows easy handling and use in clinical settings

DESCRIPTION/SIZE	
Surgitech Infusion Access Adapter - A1	CMDR-2025-04148

Needle-Free Connector Adapter

Features & Benefits

- The adapter facilitates fluid aspiration and injection while maintaining a closed system.
- It is compatible with standard Luer-lock syringes and IV sets.
- The device is constructed from durable, medical-grade materials to ensure structural integrity.
- The design minimizes dead space to prevent residue accumulation and reduce flushing requirements.

DESCRIPTION/SIZE	
MED-0413	Needle-Free Connector Adapters, NFC: Negative
MED-0414	Needle-Free Connector Adapters, NFC: Positive

Pre-filled Normal Saline Flush Syringe

Features & Benefits

- Contains 0.9% sodium chloride injection that is sterile, non-pyrogenic, and preservative-free.
- Three-piece syringe construction with 6% Luer connector for secure attachment.
- Sealed with a protective tip cap to maintain sterility until use.
- Sterile fluid path sterilized via moist heat for reliable clinical performance.

DESCRIPTION/SIZE	
Size:3ml, 5ml, 10ml	-

GASTROENTEROLOGY

Stomach Tube

Features & Benefits

- Designed for safe and efficient delivery of nutrition directly to the stomach or intestines.
- Made from soft, flexible materials to minimize patient discomfort during use.
- Clearly marked measurements ensure accurate placement and monitoring.
- Latex-free and sterile, reducing the risk of infection and allergic reactions.
- Compatible with various feeding formulas and medical devices for versatile use.

Feeding Tube

Surgitech Feeding Tube is used for enteral feeding to provide nutrition to patients who cannot obtain nutrition by mouth, unable to swallow safely or need nutritional supplementation.

Features & Benefits

- X-ray visibility ensures precise placement and verification of the tube's position.
- Made from soft, flexible material to provide patient comfort during long-term use.
- The graduated markings assist in accurate depth measurement for safe insertion.
- Latex-free to reduce the risk of allergic reactions in sensitive patients.
- Compatible with standard feeding systems for efficient nutrient delivery.

DESCRIPTION/SIZE	UOM	QTY/BOX

Ryle's Silicone Nasogastric Tube

Designed for reliable gastric intubation, this tube is made of soft, medical-grade silicone with clearly marked graduation lines and a radiopaque strip for visibility under X-ray. It is constructed with smooth distal openings to minimize resistance and is supplied sterile, ready for single use.

Features & Benefits

- Made of medical-grade silicone that is soft, flexible, and non-toxic
- Marked with clear centimeter graduations for accurate placement and monitoring
- Radiopaque line allows easy verification of tube position under X-ray
- Multiple side holes ensure efficient drainage and feeding

Percutaneous Endoscopic Gastrostomy Kit

PEG Kit

PEG-KIT is used for solving the nutritional problems of patients by establishing a passage to the outside between anterior wall of stomach and anterior abdominal wall. It shall be used above 30 days under direct clinical supervision

- Features & Benefits
- A complete set with a medical-grade silicone tube, peel-away sheath, and introducer needle.
 - Features an internal gastric bolster and an external retention disc to secure the tube in place.
 - The kit contains a universal feeding adapter, a bolus feeding adapter, and a clamp for controlled delivery

DESCRIPTION/SIZE	
Standard Pack	-
Luxury Pack	-

Sterile Bulb Top Irrigation Syringe

Surgitech Sterile Bulb Syringe is designed to fit directly into a large lumen tubing, used for intraoperative irrigation, and it can also be used to deliver nutritional support to a patient with a feeding tube.

- Features & Benefits
- Large and elongated tip to facilitate feeding and water flushes
 - Smooth tip to minimize injury during wound irrigation
 - Soft and pliable bulb for easy control
 - 60cc capacity

RENAL CARE

Hemodialysis Blood Circuit

Bloodlines

Features & Benefits

- Designed for efficient blood filtration and optimal dialysis treatment.
- Compatible with most dialysis machines for versatile usage.
- Sterilized and ready-to-use, ensuring patient safety and convenience.
- High-quality materials minimize the risk of contamination or clotting.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
REN-0017	Bloodlines - W - Pedia (20ml/ 6.4mm)	Pc	1	MDR-06582

Hemodialyzer

High Flux

Features & Benefits

- Provides high-flux filtration for improved toxin removal during dialysis.
- Compatible with various dialysis machines, ensuring versatile use.
- Made with biocompatible materials to reduce patient complications..
- Sterilized and ready for immediate use, ensuring patient safety.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN

Disposable Blood Transfusion Set

Features & Benefits

- Made with medical-grade materials for safe blood transfusions.
- Equipped with a precision filter to prevent particle contamination.
- Sterilized and disposable to ensure patient safety and hygiene.
- Clear tubing allows easy monitoring of blood flow during transfusion.
- Universal compatibility with standard blood bags and IV systems.

STERILIZATION

Autoclave

Sterilization Indicator Tape

A pressure-sensitive adhesive tape used for sealing sterilization packs and indicating exposure to steam sterilization processes. It is made of durable material with chemical indicator lines that change color after proper autoclaving.

Features & Benefits

- Strong adhesive ensures secure sealing of wraps and packages during sterilization.
- Clear indicator lines change color to confirm steam sterilization exposure.
- Resistant to high temperatures and pressure within standard autoclave cycles.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN	
SUR-0232	Autoclave Tape w/ Steam Indicator: 19x50	Pcs	1	117	Exemption
SUR-0233	Autoclave Tape w/ Steam Indicator: 25x50	Pcs	1	90	Exemption

Self-Sealing Sterilization Pouch

A high-quality sterilization pouch designed with a secure self-sealing adhesive strip, allowing for safe and reliable packaging of medical instruments prior to sterilization. It features a multi-layer film and medical-grade paper that provide visibility and strength.

Features & Benefits

- Constructed from durable medical-grade paper and transparent multilayer film for effective sterilization.
- Equipped with an integrated adhesive seal that eliminates the need for heat sealing.
- Color-changing indicator marks confirm exposure to sterilization processes.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX
MED-0185	Heat Sealing Flat Pouch (200x210)	Pack	100

Sterilization Gusseted Reel

Sterilization Gusseted Reels are designed for secure and efficient packaging of medical instruments, featuring durable medical-grade paper and a transparent multilayer film to maintain sterility until use. The gusseted structure allows easy packing of larger or bulky items with reliable sealing.

Features & Benefits

- Manufactured with medical-grade paper and high-strength transparent multilayer film.
- Equipped with clear sterilization indicator marks for monitoring process completion.
- Gusseted design provides flexible capacity for larger or irregularly shaped instruments.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	
SUR-0004	Heat Sealing Gusseted Reel 150x100 (6)	Roll	1	Exemption

Sterilization Flat Reel

A sterilization flat reel is a medical packaging material designed for steam and EO sterilization, composed of medical-grade paper on one side and multilayer heat-sealable film on the other, ensuring sterile barrier protection and visibility of contents.

Features & Benefits

- Ensures reliable sterilization of medical instruments, enhancing safety.
- Durable material withstands high temperatures and pressure during sterilization.
- Transparent design allows for easy monitoring of contents.

Sealer Machine

A gusseted roll sealer is designed for reliable sealing of sterilization rolls and pouches, ensuring secure closure and maintenance of sterility. It features a precision heating element and durable sealing mechanism to produce consistent seals for medical packaging use.

Features & Benefits

- Equipped with a high-temperature sealing element for uniform and secure seals
- Adjustable sealing width suitable for various roll and pouch sizes
- Built with a durable stainless steel housing for long-term performance

CODE	DESCRIPTION/SIZE	UOM
MED-0499	Gusseted Roll Sealer Machine	Pc

Cutter Machine

The gusseted roll cutter machine is designed for precise cutting of medical-grade sterilization rolls, ensuring clean and consistent edges for safe packaging. It is equipped with a sturdy frame, integrated cutter blade, and roll holder for efficient operation.

Features & Benefits

- Heavy-duty stainless steel construction provides durability and resistance to corrosion.
- Integrated sharp cutting blade ensures smooth and accurate roll separation.
- Adjustable roll holder accommodates various roll widths and gusset sizes.
- Non-slip base enhances stability during use and improves operator safety.

CODE	DESCRIPTION/SIZE	UOM
MED-0500	Gusseted Roll Cutter Machine	Pc

ORTHOPEDIC PRODUCTS

Walker

Features & Benefits

- Allows alternating movement of each side, providing a more natural walking motion.
- Lightweight and easy to maneuver, enhancing user mobility.
- Height-adjustable design accommodates various user needs.
- Durable construction ensures long-term use and stability.
- Foldable for convenient storage and transport.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX
MED-0430	Reciprocal Walker	Pc	1

Walker with wheels

Features & Benefits

- Lightweight frame for easy maneuverability and transport.
- Two front wheels provide smooth and effortless movement.
- Adjustable height to ensure a customized and comfortable fit.
- Foldable design allows for convenient storage and portability.
- Sturdy construction offers reliable support for enhanced stability.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX

MED-0263	Stainless Single Cane	Pc	1	60

Tripod Cane with Chair

Features & Benefits

- Combines a walking cane and seat for added convenience and mobility support.
- Lightweight and foldable design makes it easy to carry and store.
- Durable construction ensures long-lasting stability and safety.
- Comfortable seat provides a resting spot during long walks or waits.
- Adjustable height allows for personalized comfort and proper posture.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
MED-0264	Stainless Tripod Cane with Chair	Pc	1	30

Safety Toilet Hand Rail

Features & Benefits

- Provides sturdy support for safe bathroom use and fall prevention.
- Easy-to-install design fits most toilets for convenience and accessibility.
- Non-slip grips ensure a secure hold, even with wet hands.
- Adjustable height accommodates various user needs and preferences.
- Durable, rust-resistant materials offer long-lasting support and reliability.

DESCRIPTION/SIZE	UOM	QTY/BOX
Safety Toilet Hand Rail	Pc	1

Shampoo Basin

Features & Benefits

- Lightweight and portable design for easy use in any location.
- Durable plastic construction ensures long-lasting performance.
- Compact size makes it convenient for storage and travel.
- Includes a drainage hose for mess-free water disposal.
- Ideal for bed-bound or elderly patients requiring at-home care.

DESCRIPTION/SIZE	UOM	QTY/BOX
Shampoo Basin	Pc	1

Plaster of Paris

Features & Benefits

- Quick-setting plaster ideal for medical casting and orthopedic use.
- Provides strong, durable support for immobilizing fractures and injuries.
- Easy to mold and shape, ensuring a precise fit for patient comfort.
- Lightweight yet firm, offering stability without adding excess weight.

Cohesive Elastic Bandage

Secure and reliable compression, ideal for supporting injuries, reducing swelling, and holding dressings in place without the need for clips or fasteners. Designed for both medical and athletic use, it ensures comfort, flexibility, and ease of application.

Features & Benefits

- Color: brown, blue, yellow, red, pink, green, black
- Self-adhering design that sticks only to itself and not to skin or hair
- Provides consistent compression to support joints and muscles
- Breathable and lightweight material for extended comfort

DESCRIPTION/SIZE	UOM

Silicone Dressing

Self-adherent soft silicone dressing

Advanced silicone dressing is designed to provide gentle adhesion, effective wound protection, and atraumatic removal, making it suitable for sensitive or fragile skin.

Features & Benefits

- Soft silicone layer gently adheres to skin without sticking to the wound bed
- Reduces pain and trauma during dressing changes for patient comfort
- Provides a protective barrier that helps maintain a moist healing environment

DESCRIPTION/SIZE	UOM

CMC Wound Dressing

Provides an advanced wound care solution designed to absorb exudate, maintain a moist healing environment, and promote faster recovery for various wound types. It is highly effective in managing moderate to heavily exuding wounds while ensuring patient comfort.

Features & Benefits

- High absorbency supports effective exudate management
- Maintains a moist environment to promote faster healing
- Soft and conformable material enhances patient comfort
- Reduces risk of maceration and infection through fluid control

Silver Alginate Wound Dressing

Standard

This sterile wound dressing is composed of alginate fibers combined with ionic silver, providing a high-absorbency structure while maintaining a controlled barrier against contamination. The material is soft, conformable, and designed for ease of application in various wound care settings.

Features & Benefits

- Provides sustained antimicrobial action through silver ion release
- Absorbs excess wound exudate to maintain optimal moisture balance
- Helps reduce bacterial colonization and supports an improved healing process

DESCRIPTION/SIZE	UOM	
Silver Alginate Wound Dressing - Standard	Box	CMDR-2024-03382A

Silver Alginate Wound Dressing

Re-enforced

This sterile dressing is composed of alginate fibers integrated with silver ions and reinforced with a supportive layer to provide strength and structural stability during use. It is designed to maintain integrity while ensuring reliable performance in clinical applications.

Features & Benefits

- Provides sustained antimicrobial activity with silver to help reduce bacterial growth
- Reinforced design ensures strength and minimizes dressing breakdown during wear
- High absorbency helps manage wound exudate and maintain a moist healing environment

DESCRIPTION/SIZE	UOM	
Silver Alginate Wound Dressing - Re-enforced	Box	CMDR-2024-03382B

Alginate Wound Dressing

This sterile wound dressing is composed of natural alginate fibers that form a soft, absorbent pad designed to maintain a controlled environment at the wound site. It is supplied in individually sealed packaging to ensure product integrity and sterility.

Features & Benefits

- Absorbs excess wound exudate effectively to prevent leakage and maceration
- Forms a protective gel that maintains optimal moisture balance for healing
- Supports natural autolytic debridement and reduces dressing change frequency

DESCRIPTION/SIZE	UOM

Oxygen Regulator

Features & Benefits

- Compatible with ALL Oxygen Tanks
- Oxygen flow range: 1–10L/Min/1–15L/Min
- Pressure reducing range: 2.0–3.0kg
- Relief valve pressure range: (3.5kg+–0.5kg)

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN	
MED-0255	Fujikawa Oxygen Regulator	Unit	1	20	

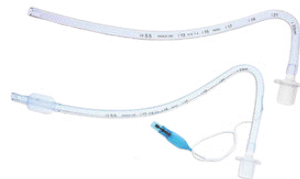

Nasal Performed Tracheal Tube

Cuffed & Uncuffed

Features & Benefits

- The tube is made from medical-grade, thermosensitive PVC, which softens at body temperature to conform to the patient's anatomy.
- The high-volume, low-pressure cuff on the cuffed version minimizes mucosal pressure while ensuring an effective seal.

CODE	DESCRIPTION/SIZE	
Size: 2.0 - 10.0mm		-

Venturi Mask

With 2 diluters

A precision oxygen delivery device designed for controlled and accurate administration of oxygen therapy in clinical settings. It ensures reliable patient care by providing fixed oxygen concentrations suitable for varied medical requirements.

Features & Benefits

- Provides consistent and accurate oxygen concentration for effective respiratory management
- Includes 2 interchangeable diluters for flexibility in oxygen delivery levels
- Designed with a comfortable mask and adjustable strap for patient convenience
- Manufactured from medical-grade materials ensuring safety and durability

DESCRIPTION/SIZE	
Small	CMDR-2025-04494A
Medium	CMDR-2025-04494A
Large	CMDR-2025-04494A
X-Large	CMDR-2025-04494A

Venturi Mask

With 7 diluters

Designed for precise oxygen delivery, ensuring controlled oxygen concentration for patients requiring accurate respiratory therapy. It is an essential device in clinical and hospital settings for safe and effective oxygen administration.

Features & Benefits

- Provides consistent and reliable oxygen concentration levels
- Includes 7 diluters for adjustable oxygen delivery
- Designed with a soft, clear mask for patient comfort and visibility
- Compatible with standard oxygen tubing for easy clinical use

DESCRIPTION/SIZE	
Small	CMDR-2025-04494B
Medium	CMDR-2025-04494B
Large	CMDR-2025-04494B
X-Large	CMDR-2025-04494B

Disposable Prefilled Bubble Humidifier

Provide consistent humidification for patients receiving oxygen therapy, helping reduce dryness and discomfort for improved respiratory care. It is prefilled and ready to use.

Features & Benefits

- Prefilled design eliminates the need for manual filling and reduces contamination risk
- Produces optimal humidification for patient comfort during oxygen therapy
- Single-use, disposable unit ensures hygiene and infection control
- Compatible with standard oxygen therapy equipment for versatile use

DESCRIPTION/SIZE	
CDH 350	CMDR-2025-04599
CDH 500	CMDR-2025-04599

Nebulizer Kit

With Mask

Features & Benefits

- Includes a mouthpiece for direct inhalation, enhancing medication delivery.
- Features a universal mask for compatibility with various nebulizers.

Disposable Suction Catheter

Designed for efficient removal of secretions, this sterile, single-use device is constructed from high-quality medical-grade material and features a smooth surface for atraumatic insertion. It is equipped with a universal connector for secure attachment and is individually packed to maintain sterility.

Features & Benefits

- Sterile, single-use design ensures hygienic and safe suctioning.
- Soft, flexible material minimizes discomfort during suction procedures.
- Clear markings for precise depth control and effective suctioning.
- Available in various sizes to suit different patient needs.
- Packaged individually to maintain sterility and prevent contamination.

Manual Resuscitator Silicone

This device is designed for manual ventilation and is constructed from high-quality silicone material for durability and repeated sterilization. It is supplied with a transparent mask, oxygen reservoir bag, and standard connectors to ensure reliable performance in professional settings.

Features & Benefits

- Reusable silicone material ensures durability and long-term use.
- Ergonomic design allows for a secure and comfortable grip during operation.
- Made of 100% medical-grade silicone with excellent elasticity and durability
- Includes transparent, anatomically shaped mask with secure seal

Manual Resuscitator PVC

This device is a hand-operated resuscitation system constructed from high-quality PVC, designed to provide controlled airflow through a self-inflating bag, oxygen reservoir, and mask. It is reusable after proper cleaning and includes standardized fittings for reliable performance.

Features & Benefits

- Durable, lightweight PVC construction ensures reliable performance and easy portability.
- Transparent mask allows for visual monitoring of patient's airway and breathing.
- Ergonomic design provides comfortable grip for precise, controlled ventilation.
- Includes a reservoir bag for optimal oxygen delivery during resuscitation.

Three Ball Incentive Spirometer

Features & Benefits

- Helps improve lung function by encouraging deep breathing exercises.
- Features three colored balls to visually monitor progress and lung capacity.
- Lightweight and portable, ideal for use at home or in a clinical setting.
- Easy to clean and maintain for long-term use.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
SUR-0231	Three Ball Incentive Spirometer	Pc	1	24

Tracheostomy Tube Holder

The Surgitech Tracheostomy Tube Holder is designed to comfortably secure tracheostomy tubes in place, ensuring patient safety and reducing the risk of accidental displacement.

Features & Benefits

- Securely holds tracheostomy tubes in place, minimizing the risk of movement.
- Adjustable strap for a comfortable and customized fit.
- Soft, hypoallergenic materials reduce irritation around the neck area.
- Easy to apply and remove for quick adjustments during patient care.

DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN

Electrosurgical Cautery Pencil with Scratch Pad

Features & Benefits

- Ergonomically designed for comfortable handling during procedures.
- Features a retractable blade for precise and controlled cutting.
- Compatible with a wide range of electrosurgical units for versatile application.
- Disposable design ensures sterility and reduces the risk of cross-contamination.

Ultrasonic Surgical System

The Ultrasonic Surgical System(Ultrasonic Scalpel) is a groundbreaking piece of clinical surgical system that uses ultrasonic energy to process soft tissue cutting and vessel sealing. It can be used to cut soft tissues and seal blood vessels up to 5 mm in diameter except for bone tissue incision and reversible fallopian tubal ligation.

Y16-E Generator

Y16-E generator provides excitation signal and high frequency AC power to drive the hand piece. It provides two power outputs, MIN and MAX, and offers 5 levels of power adjustment to meet different clinical requirements such as fast dissection or reliable coagulation.

Hand Pieces HP401/HP501

The hand piece is available in two models:HP401 and HP501, for use with gun-type scalpels (SG) and scissor-type scalpels(SS).

- Efficient ultrasonic drive circuit and control algorithm.
- Mechanical power button, ensuring system reliability and safety.
- Tilted touch screen design for smooth and comfortable operation.
- 12 level adjustable volume setting to meet different surgeons' voice feedback requirements.

- Aluminum alloy shell: High strength and corrosion resistant.
- Gold-plated electrode: Ensures optimal signal transmission.
- Piezoelectric components: Provide stable performance.
- Lightweight design: HP501 (160g) offers dexterity, precision, and reduced fatigue.

Gun-type Scalpel

SG Series

- Shaft length - 13/22/35/45CM
- Diameter - 5MM

BSG Series

- Shaft length - 22/35/45CM
- Diameter - 5MM

Scissor-type Scalpel

SS Series

- Shaft length - 9/17CM
- Diameter - 5.5MM

Footswitch & Cart

Footswitch

FSW01

- Pedal switches: Control minimum and maximum energy for flexible use.

Cart

CRT01-E

- H-shaped cart: Stable and lightweight.
- Dual handles, drawers, and hanger: Provide easy handling and expandability.

SHOULIANG-MED

AGISEAL Vessel Sealer

The AGISEAL Vessel Sealer is an advanced, energy-based bipolar surgical instrument designed for fusing blood vessels and tissue bundles, up to 7mm in diameter, during laparoscopic and open procedures. It combines bipolar energy with precise jaw pressure to create a permanent seal, reducing thermal damage and enhancing surgical safety and efficiency.

Electrosurgical Generator SL100M

The Agiseal SL100M is a compact electrosurgical generator designed to provide precise cutting and coagulation during surgical procedures. It features reliable output control and essential safety components to support a wide range of applications.

- Provides monopolar and bipolar modes with stable power delivery.
- Equipped with digital display for accurate output monitoring.
- Includes automatic self-check system to ensure operational safety.

AGISEAL Port

- Port for connecting AGISEAL instruments to the generator.

Bipolar Port

- Port for connecting bipolar instruments to the generator

Electrosurgical Vessel Sealer/Divider

A specialized surgical instrument designed to seal and divide blood vessels and tissue with high precision. It integrates advanced electrosurgical technology with ergonomically engineered components for reliable performance.

- SL08 Series Curved Jaw
- SL09 Series Straight Jaw
- SL05 Series Curved Jaw
- SL51 Series Straight Jaw
- SL11 Series Straight Jaw
- AC01 Series Curved Jaw
- Small Jaw
- Big Curved Jaw

Electrosurgical Cautery Machine

350A

The Surgitech Electrosurgical Cautery Machine is designed for precise cutting and coagulation in surgical procedures, utilizing advanced high-frequency energy delivery. It comes equipped with dedicated handpieces and control features to ensure reliable operation in various clinical applications.

Features & Benefits

- Electrosurgical Generator (Vessel Sealing) Max Power: 350W
- Excellent compatibility
- Available in vessel sealing Suitable for general surgery, vascular surgery, hepatobiliary and pancreatic surgery, cardiothoracic surgery, gastroenterology, TURP and TUVF.
- Compatible with argon coagulation, cystoscopy, arthroscopy, laparoscopy and hysteroscopy.

CODE	DESCRIPTION/SIZE	UOM
SUR-0031	Electrosurgical Generator: 350A	Pc CDRHR-CMDN-2023-1213300

Electrosurgical Generator

50

Electrosurgical Generator High Frequency Coagulator Excising and destroying the lesions beneath superficial mucosa through performing electrodesiccation, fulguration or coagulation. This unit is widely used in plastic surgery, dermatology, ENT, ophthalmology, stomatology, gynecology, proctology and urology.

Features & Benefits

- Monopolar output mode without using the dispersive electrode
- Contact or insert into the tissue with the electrode
- Suitable for hemostasis and shrinkage of tissue.
- Used in good control hemostasis.
- Suitable for cutting demanding for good hemostasis.
- Another monopolar output mode without using dispersive electrode

CODE	DESCRIPTION/SIZE	UOM
	Electrosurgical Generator: 50	Pc

Electrosurgical Generator

100C

A unique dual radio frequency design, combine 4Mhz into one generator. Realize the best operation result effectively. Suitable for plastic, Dermatology, Dentistry, Podiatry and Spinal surgery etc.

Features & Benefits

- Clinic result proves that higher frequency can get less tissue resistance. 4Mhz frequency can reduce heat injury and carbonizing to tissue at maximum. It realizes low temperature cutting.
- Antenna pad is unnecessary for skin touch, no current goes through body and no possibility of burning
- No pressure cutting and the pencil is operated easily and its full of flexibility.
- No carbonation, less bleeding and no adhesions, less pain, scarring and fast healing after operation.

CODE	DESCRIPTION/SIZE	UOM
SUR-0272	Electrosurgical Generator: 100C	Pc

Vessel Sealer Divider

Can be used to safely seal large blood vessels, lymphatic vessels and tissue bundles containing blood vessels or lymphatic vessels.

Features & Benefits

- Vessels up to and including 7mm
- Lymphatics, Tissue bundles
- Fast sealing speed of 2-4 seconds
- Single activation 60 degrees
- Multiple activations less than 90 degrees
- Optimal stress release
- High burst strength seals

CODE	DESCRIPTION/SIZE	UOM
	Vessel Sealer Divider	Pc

5mm Blunt Tip Instrument

SL0923, SL0937, SL0944

For use in minimally invasive or open surgical procedures, may include but are not limited to Nissen fundoplication, colectomy, cholecystectomy, adhesiolysis, hysterectomy, oophorectomy etc.

Features & Benefits

- Hand and foot activated

JAWS	SHAFT
• Blunt • 18.3 mm seal length • 16.8 mm cut length	• 23 cm, 37 cm, 44 cm shaft lengths • 5 mm shaft diameter shaft dimensions • 180 degrees shaft rotation

FulGrip Reload

Features & Benefits

- Narrower and sharper tip.
- GFRP (glass fiber reinforced polymer) staple driver.
- Reload releaser paired as default accessory in the application.
- Easier tissue penetration and jaw placement.
- Prevents tissue from sliding or bunching, and prevents staples from malforming.
- The easiest and safest solution to release reloads from the channel jaw.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
	FulGrip Reload	Pc	1	-

Flat Deck Reload

Features & Benefits

- Ensures traceability and serviceability for every reload marketed globally.
- The easiest and safest solution to release reloads from the channel jaw.
- Prevents tissue from sliding or bunching, and prevents staples from malforming.
- The easiest and safest solution to release reloads from the channel jaw.

Step-Wise Staple Reload

Features & Benefits

- 3 rows of staples, each of varying heights.
- This accommodates the tissue structure and prevents unexpected bleeding.
- Blade ejects out at the initial stage of firing.
- Built-in blade would eliminate the wearing of the blade.
- Maximized sharpness guaranteed.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
	Step-Wise Staple Reload	Pc	1	-

Disposable Endoscopic Trocars

Flagship

Features & Benefits

- Detachable Structural Design Integrated Gas Valve
- Eliminates inadvertent closure of the gas inflation valve due to colliding with the abdominal wall.
- Allows the greatest synergy between hand and trocar penetrating the abdominal wall.
- 30° Endoscopic Optical Trocar
- 0° to 30° viewing angles for endoscopes. Tissue level can be monitored during puncture.
- Reduce fascia damage.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX	QTY/CTN
	Trocar Set - BLTCS, BLTC10, BLTC12, BLTC15	Pc	16	CMDR-2025-04058B
	Trocar Sleeve - BSLT, B10LT, B12LT, B15LT	Pc	16	CMDR-2025-04058A

Pioneer

Features & Benefits

- Bladeless noncutting trocar tip and 0° to 30° viewing angles for endoscopes.
- Integrated gas valve. Prolonged wavy texture on the sleeve thread.
- Wider visual scope. Minimized sealing part takes up a smaller space.
- Improved stability and accommodates various insertion depths.

CODE	DESCRIPTION/SIZE	UOM	QTY/CTN
	Trocar Set - FLPC5, FLPC10, FLPC12	Pc	16
	Trocar Sleeve - FSLP, F10LP, F12LP	Pc	16

Mini

Features & Benefits

- Irreversible stopcock valve.
- Installable gas injection valve.
- Great flexibility for different application needs or preferences. Wider visual scope.
- Smaller size allows greater tilting angles, hence less inter-instrumental collisions and granting more space for operations.

CODE	DESCRIPTION/SIZE	UOM	QTY/CTN

	Trocar Sleeve - FSLT, F10LT, F12LT	Pc	16

Disposable Endoscopic Specimen Retrieval Bag

Features & Benefits

- The bags are divided into transparent and opaque types.
- It is divided into three specifications of 5, 10 and 12 according to different pipe diameters.
- It can be divided into 6 different sizes according to the capacity of the carrying bag.
- The pipe diameters are made of either plastic or steel.

CODE	DESCRIPTION/SIZE	UOM	QTY/BOX
	FRC1-10, FRC4-10, HRC1-10, HRC4-12	Pc	1

Open Staplers

Disposable Linear Cutter Stapler & Reloads

Features & Benefits

- The cutter is made by imported stainless steel 440
- Tissue retaining button designed to protect good firing and good staple formed
- 55mm, 75mm, 100mm sizes for your good choice

Self-Retaining Retractor Rings

The self retaining retractor is used to retract soft tissues to expose the surgical field during gynecology surgery, general surgery, head and neck surgeries, and colon/rectal surgeries.

Features & Benefits

- Provides stable hands-free retraction for clear surgical access
- Adjustable tension for varied tissue depths
- 360° retraction capability around the incision
- Available with sharp or blunt hooks
- Disposable design for sterile, single-use efficiency
- Lightweight and quick to assemble in the OR

Elastic Hooks

Elastic hooks are used to retract soft tissues to expose the surgical field during gynecology surgery, general surgery, head and neck surgeries, and colon/rectal surgeries.

Features & Benefits

- The hook is intended for medical use. Please read the instruction carefully before use.
- The hook is disposable.
- It is recommended that the hooks be used with retractors

Disposable Aspiration Bone Biopsy Needle

Chamfond Disposable Bone Marrow Biopsy Needle—ergonomically designed with a super-sharp tip for efficient, minimally invasive sampling across diverse patient types.

Features & Benefits

- Super-sharp stainless steel tip for smooth cortical penetration
- Ergonomic palm-fit handle with anti-turn locking mechanism
- Adjustable needle length for safe, versatile use
- Multihole and double-tip design for efficient multi-point aspiration
- Five-sided cutting edge with tapered sleeve for reliable sample capture

Suction Poole Drain

The Surgitech Suction Poole Drain is used during surgeries to efficiently evacuate blood and fluids from the surgical site, ensuring a clear field for the surgeon to work.

Features & Benefits

- Designed for effective removal of large volumes of fluid during surgical procedures.
- Rounded tip and multiple perforations reduce tissue trauma and clogging.
- Made from durable, high-quality materials for reliable and consistent performance.
- Sterile and ready-to-use, ensuring patient safety and reducing infection risk.

DESCRIPTION/SIZE	UOM	QTY/BOX

UROLOGICAL PRODUCTS

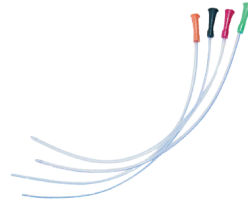

Nelaton Catheter

The Surgitech Nelaton Catheter is a sterile, single-use urinary catheter designed for easy insertion and patient comfort. Its flexible, smooth design ensures minimal trauma, providing a safe and effective solution for temporary catheterization.

Features & Benefits

- Soft, flexible material ensures patient comfort during catheterization.
- Sterile and ready-to-use for single-use applications, reducing the risk of infection.
- Smooth, rounded tip minimizes tissue trauma during insertion.
- Transparent design allows for easy visual monitoring during use.

Silicone Foley Catheter

A sterile and durable indwelling catheter designed for safe urinary drainage, providing comfort and reliability for both short-term and long-term use.

Features & Benefits

- Medical-grade silicone construction offers excellent flexibility and durability
- Smooth, atraumatic surface enhances patient comfort during insertion and use
- Balloon provides secure placement and minimizes risk of accidental displacement
- Transparent material allows easy monitoring and ensures effective drainage

Angiographic Syringes

Angiographic syringe is compatible with high-pressure injection equipment during CT, DSA and MRI, and also compatible with a broad range of different brand machines. Used to inject contrast material into the patient's vascular system to diagnostic and therapeutic the vessels by x-ray photography.

Features & Benefits

- Clear and transparent barrel allows easy visualization of contrast media
- Ergonomic design provides comfortable handling and smooth operation
- Graduated markings ensure accurate measurement and dosage control
- Widely used in cardiology, radiology, and interventional procedures.

Patient Monitor

Venus

A high-performance multiparameter monitoring system built for ICU, CCU, and NICU environments. It delivers reliable real-time tracking across adult, pediatric, and neonatal patients.

- 15.6" high-resolution touchscreen for clear, intuitive monitoring
- Displays up to 10 waveforms with 12-lead ECG capability
- Monitors multiple parameters including ECG, SpO₂, NIBP, TEMP, RESP, and PR
- Expandable with optional modules like IBP, EtCO₂, BIS, and gas analysis
- Stores up to 72 hours of waveform and 168 hours of trend data
- Built-in arrhythmia, ST analysis, and hemodynamic calculations
- Rechargeable high-capacity Li-ion battery for continuous operation

COMEN

Anesthesia Machine

AX700

An electronically controlled anesthesia workstation featuring a 12.1" TFT touchscreen and powerful ventilator designed for adult and pediatric use in modern ORs.

- Provides wide ventilation modes with optional advanced modules (EtCO₂, BIS, AGSS, ACGO, suction).
- Uses traditional pneumatic flowmeters for gas control.
- Compact 12.1" touchscreen interface with modular design.
- Pediatric-friendly with auxiliary O₂ supply, suction, and scavenging systems.

DESCRIPTION/SIZE

Comen Anesthesia Machine AX700

CDRRHR-CMDN-2023-1262783

AX900

A modern anesthesia workstation combining classic pneumatic drive with advanced electronic controls, offering precise ventilation and intelligent quality management in one intuitive package.

- Advanced electronic fresh gas control with closed-loop low-flow guidance.
- Built-in anesthesia quality management with alerts, reminders, and usage tracking.
- Touchscreen interface with auto self-check, leak test, and workflow tools.
- Pneumatic-electronic drive with ascending bellows for precise neonatal to adult ventilation.

DESCRIPTION/SIZE

Comen Anesthesia Machine AX900

OR Table and Lamp

Operating Table W5

A modular, electro-hydraulic operating table offering exceptional adaptability, high-load capacity, and ergonomic precision for diverse surgical procedures.

- Electro-hydraulic drive system for smooth, precise movements
- Modular design adaptable for multiple surgical positions
- X-ray-transparent tabletop with ≤1 mm AL filtration
- Durable Grade-304 stainless steel construction
- Auto-lock safety with overload protection on leg plates
- High load capacity with 1,250 kg static and 550 kg dynamic tests
- Wide adjustment range with 680–980 mm height and 320 mm lateral translation

DESCRIPTION/SIZE

Comen Operating Table W5

CDRRHR-CMDN-2023-1293127

Surgical Light L5

An advanced dual-arm LED operating light featuring adaptive, shadow-free illumination and high-fidelity color rendering for precision surgical lighting.

- Adaptive LED lighting maintains consistent brightness
- Smart intensity preserves illumination in deep cavities
- Flicker-free DC dimming protects eyes and supports video
- Three selectable modes: Bright, Normal, Endoscopic
- High color rendering index (Ra ≤ 98) for tissue accuracy
- Flexible configurations with dual or satellite light options

Acclarix LX9

The Edan Acclarix LX9 is a premium diagnostic ultrasound system featuring a 21.5" HD display with touchscreen control, advanced imaging technologies, and smart workflow tools, designed to deliver precise, reliable results across a wide range of clinical applications.

- 21.5" HD display with 14" touchscreen control
- Dual lithium-ion batteries for extended scanning
- Ergonomic adjustable panel with retractable keyboard
- Five active transducer ports for flexible imaging
- Smart workflow tools (eOptimized, eTouch, eVolume, eLearn)

DESCRIPTION/SIZE

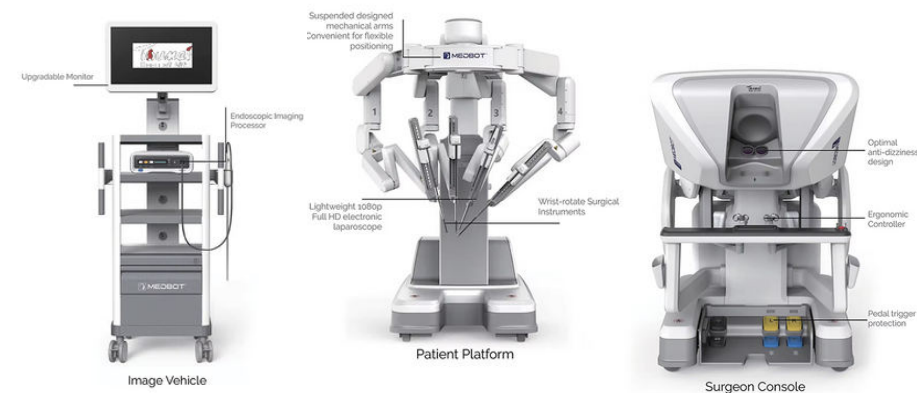

EDAN Diagnostic Ultrasound Machine LX9

Surgical Robot System Endoscopic Surgical System MT-1000

Toumai® is an advanced minimally invasive medical device that integrates multidisciplinary knowledge. It comprises the Surgeon Console, the Patient Cart, and the Image Vehicle.

- Tele-operation Technology: Toumai® allows surgeons to perform surgeries from outside the sterile surgical area, reducing the physical burden on surgeons.
- Robotic Advantages: Leveraging robotic technology, Toumai® offers benefits such as reduced invasiveness, increased precision, enhanced stability, and improved safety.
- Applications: Toumai® can be used in various surgical disciplines, including Urology Surgery, General Surgery, Gynecology Surgery and Thoracic Surgery (NMPA approval).

Flexible viewpoint

The lightweight and flexible self-designed endoscopes could be mounted on all four robot arms to provide a wider and more flexible viewing angle.

Real-time instrument monitoring

Out-of-Surgical-Field indication for the instruments, providing real-time intraoperative monitoring and tracking of surgical instrument position to ensure procedural safety and improve surgical efficiency.

Independently adjustable window

Adapting to the surgeon's observing position and bringing more comfortable surgery.

Picture in picture

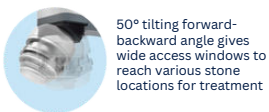

Another key feature of the Smart Stapler is intelligent tissue thickness identification. The technology allows the stapler to automatically adjust the firing speed and clamping force according to different tissue thicknesses and conditions.

WIKKON

Extracorporeal Shock Wave Lithotripsy

Ultrasonid Guided ESWL | 2-step Positioning | 0 Radiation | 0 Fuss

The U200 by WIKKON is the latest innovation that combines shock wave lithotripsy with Assisted Movement Function. With just the touch of a button, the patient table will move towards the desired location of the stone, reducing the number of steps needed for alignment.

Extracorporeal Shock Wave Lithotripter with Integrated Ultrasound Stone Localization System

- Latest technology that produces long lasting constant dosage outputs
- Optimized intensities and focus zones proven to be well tolerable and low noise treatment.
- Predictable running costs (due to fixed EMSE and parts lifespan)

Potent

Laser Lithotripsy Machine

Surgical Holmium Laser HP Series 3

The Potent Holmium Laser HP Series 3 is the world's highest-power, ultra-versatile surgical laser (up to 160W, 120Hz) that delivers superior precision in stone fragmentation, HoLEP, and multi-specialty procedures.

- High power up to 160 W with 8 J pulse energy and 120 Hz frequency
- Cannon™ Double Pulse Technology for efficient dusting with minimal retropulsion
- Ultra-long adjustable pulse width up to 2500 μ s for precise control
- Multi-specialty use: HoLEP, lithotripsy, gynecology, ENT, and general surgery
- Dual footswitch and touchscreen interface for quick operation
- Compact mobile design with wide fiber compatibility (150–1000 μ m)

CARBON

VENUS 3D Navigation & Image Fusion

Intelligent Magnetic Navigation System Based on Multi-modal Medical Image Fusion Ultrasound

Efficient

Short learning curve. Procedures are quickly mastered by junior staff

Safer

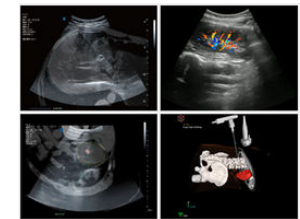

Less complications resulting from accidental injury

Faster

Shorter procedure times with better outcomes

Healthy

No ionizing radiation

- Safer interventions through accurate MRI/CT (pre-op)-Ultrasound (in-op) fusion
- Real-time 3D navigation with probe and needle tracking for pathway planning
- 1-minute automatic multi-modal target-organ and ROIs segmentation and alignment
- ZERO (in-op) ionizing radiation for PCNL

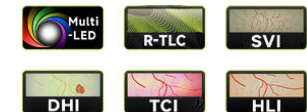

LYNMOU

Alioth Imaging Endoscopy System

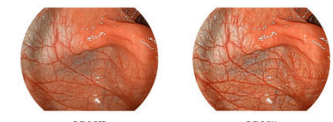

VC-1600 Series

Diagnose with unmatched clarity and confidence. The LYNMOU VC-1600 GI Endoscopy System offers superior high definition imaging and intuitive design, transforming patient care with faster, more accurate diagnoses. Elevate your practice with the future of gastroenterology

Full-Scenario Imaging Endoscopy System

- 4K display with high-speed and lossless image transmission.
- Smart Touch Panel to ensure easier operation.
- One step connection with hot-plug function.
- OTM function to save customized settings.

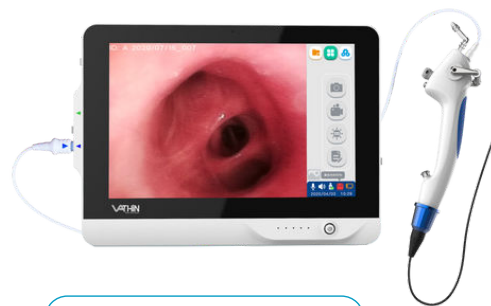

Digital Video Monitor

B1

The Vathin Digital Video Monitor B1 is designed for high-definition visualization during medical procedures, featuring an integrated display and video processing unit for reliable imaging performance.

- **Max Resolution:** (16:10) -1280 x 800 Pixels
- **Display Type:** 12.1" Color TFT LCD
- **Image Adjustment:** Sharpness and Brightness, Gamma parameters, RGB Saturation
- **Patient record editing/print**
- **Weight:** 2.14kg **Memory:** 64G
- **Battery Life:** more than 6 hours
- **File transfer:** DICOM PACS & USB Function available
- **Video out:** HDMI (1920 x 1080p, 60 fps)
- **Zoom Function:** zoom out for better visual effect
- **Connection to external screen**

Delivers clear, high-definition imaging in a compact and user-friendly design, enhancing precision and efficiency in medical procedures.
